## Method & Example

You can use any PHP method to post data, with or without cURL. Here the example to POST the data without cURL:

```
<?php
// Destination URL
$url = 'http://reporting.milestoneseo.com/api/post.php?key=911276faf2fbef92464f11ac9d3e26b6';
// Array the POST data
$data = array(
    'KEY'           => '9bedfbbb129e42cfcb8615a5218bcc86',
    'TIME'          => '2014-05-22 08:32:11',
    'NUMBER_DIAL'   => '0123456789',
    'NUMBER_CALL'   => '0123456789',
    'NUMBER_FORWARD' => '0123456789',
    'DISPOSITION'   => 'ANSWERED',
    'DURATION'      => '122',
    'FILE'          => 'http://www.someurl.com/file.mp3',
    'CAMPAIGN'      => '105831123'
);
// some http options
$options = array(
    'http' => array(
        'header' => "Content-type: application/x-www-form-urlencoded\r\n",
        'method' => 'POST',
        'content' => http_build_query($data),
    ),
);
// send the data & get the result
$content = stream_context_create($options);
$result = file_get_contents($url, false, $content);
// print the response code
var_dump($result);
?>
```

## HTTP Response Code

After send the data, you will get http response code, depend the result and condition. Here some of response you may get:

Response Code	Response Text	Comment
200	Success	All data has been saved and processed successfully
304	Not Modified	Some error happen, your data may not saved into our database
400	Bad Request	Incomplete POST data, wrong API public or API secret key
403	Forbidden	Wrong API Code

Make sure you get '200' response code, else the data will notbe saved.
